Habitat code: 9260 Region code: ALP

Field label	Note	User
2.4.12 b)Favourable reference area operators	Questo habitat favorito dall'uomo a scopi selvicolturali occupa supefici superiori al VFR. Tuttavia molte formazioni assumono caratteristiche prossimo naturali aventi composizione floristica varia ed apprezzabile. Nelle regioni alpine sono stati individuati diversi tipi forestali nell'ambito dei castagneti. Esistono certamente dei nuclei misti con rovere e/o altre latifoglie per i quali 9260 rappresenta l'unico codice Natura 2000 disponibile. Nelle cartografie fornite da alcune regioni è possibile che tali nuclei siano stati ignorati.	ISPRA_habi
